CIS 4914 | Senior Project

Class Number: 10697

Fall 2026

Instructor Information

Name: Sanethia Thomas

Course Details

Catalog Description: Involves completing a significant CISE-related project. Coordinate with the instructor and a project advisor, prepare a detailed technical report and deliver an oral presentation.

Pre- and Co-Requisites: Prereq: senior CISE standing or higher and approved project proposal.

Credit Hours: 3

Course Fees: $0.00

Additional Course Description

This course involves completing a software project. In this course, students will design and develop a software application or contribute to a software-related project. The course facilitator will guide the course requirements. Students will work in a team-based environment directly with their faculty advisor throughout the course.

Required Materials

The instructor has stated that there are no items required or recommended for this section.

Course Goals and Objectives

1. Develop openness to new ideas in computer science, develop the ability to draw reasonable inferences from observations, and learn to formulate and solve new computer science problems using analytical and problem-solving skills;
2. Develop the ability to synthesize and integrate information and ideas, develop the ability to think creatively, develop the ability to think holistically, and develop the ability to distinguish between facts and opinion;
3. Develop the ability to work individually and as part of a team, develop a commitment to accurate work, develop management skills, improve speaking and writing skills, improve the ability to follow directions, instructions, and plans, and improve the ability to organize and use time effectively;
4. Develop a commitment to personal achievement, the ability to work skillfully, an informed understanding of the role of science and technology, a lifelong love of learning, and cultivate a sense of responsibility for one's own behavior and improve self-esteem/self confidence.

Expectations and Student Learning Outcomes

Outcome	Coverage *
• An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics	High
1. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors	High
1. An ability to communicate effectively with a range of audiences	High
1. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts	High
1. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives	High
1. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions	High
1. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies	High

Methods of Evaluation

You will be evaluated by your faculty advisor on how well you work as a team and contribute individually to the project. To pass the course, you must turn in ALL assignments and complete the following:

1. A **finished product** that demonstrates the **desired functionality,** and is:
2. Systematically **tested using a variation of unit testing, integration testing, functional testing, and usability testing.**
3. Presented via 3 **presentations.**
4. Documented in the form of a **comprehensive written report.**
5. Online students present/demo the project in an asynchronous format for **Senior Showcase.** THIS IS YOUR COURSE FINAL.

Grade Category	Grader	Percentage
Participation and Assignments	Course Instructor	10%
Project Pitch	Course Instructor	10%
Presentation 1	Course Instructor	10%
Presentation 2	Course Instructor	10%
Peer Evaluation	Course Instructor	10%

Grade Category	Grader	Percentage
Final Presentation	Advisor	10%
Documentation	Advisor	10%
Project/ Code	Advisor	20%
Individual Contribution	Advisor	10%
Total		100%

Grading Scale

Letter grade and percentage

Letter	Percentage Value
A	94 - 100%
A -	90 - 93%
B +	87 - 89%
B	83 - 86%
B -	80 - 82%
C +	77 - 79%
C	73 - 76%
C -	70 - 72%
D +	67 - 69%
D	63 - 66%
D -	60 - 62%
E	59% and below

Course Schedule

Week	Topic
0	Orientation/Tuckman's Team Development Model
1	NACE Competencies/Project Pitch
2	Essential Scrum/AI Integration and Implementation Configuration Management
3	Pitch Presentation
4	Workforce Best Practices
5	Professional Development 1
6	Presentation 1
7	Professional Development 2
8	Software Testing
9	Usability - Global Software Engineering Perspectives
10	Presentation 2
11	COIL - Global Exchange
12	COIL - Global Exchange
13	Final Exam
14	Break

Week	Topic
15	Course Wrap

Schedule of Assignments

Due Dates	Assignments	Type of Assignment	Points
8/23/26	Online Discussion	Participation	10
8/30/26	Online Discussion	Participation	10
9/1/26	Team Contract	Assignment	25
9/8/26	Project Pitch	Assignment	50
9/6/26	Online Discussion	Participation	10
9/13/26	Individual Report	Assignment	10
9/13/26	Team Report	Assingment	10
9/13/26	Online Discussion	Participation	10
9/20/26	Individual Report	Assignment	10
9/20/26	Team Report	Assignment	10
9/20/26	Online Discussion	Participation	10
9/27/26	Individual Report	Assignment	10
9/27/26	Team Report	Assignment	10
9/27/26	Online Discussion	Participation	10
10/4/26	Presentation 1	Presentation 1	100
10/4/26	Project Evaluation 1	Assignment	25
10/4/26	Peer Evaluation	Peer Evaluation	100
10/11/26	Individual Report	Assignment	10
10/11/26	Team Report	Assignment	10
10/11/26	Online Discussion	Participation	10
10/18/26	Individual Report	Assignment	10
10/18/26	Team Report	Assignment	10
10/18/26	Online Discussion	Participation	10
10/25/26	Individual Report	Assignment	10

Due Dates	Assignments	Type of Assignment	Points
10/25/26	Team Report	Assignment	10
10/25/26	Online Discussion	Participation	10
11/1/26	Presentation 2	Presentation 2	100
11/1/26	Project Evaluation 2	Assignment	25
11/8/26	Individual Report	Assignment	10
11/8/26	Team Report	Assignment	10
11/8/26	Online Discussion	Participation	10
11/15/26	Individual Report	Assignment	10
11/15/26	Team Report	Assingment	10
11/15/26	Online Discussion	Participation	10
11/22/26	Final Exam	Participation	100
11/22/26	Project Evaluation 3	Assignment	25
12/2/26	Final Presentation	Advisor	100
12/2/26	Documentation	Advisor	100
12/2/26	Project Submission	Advisor	100
12/2/26	Individual Contribution	Advisor	100

Alignment of SLOs

Code Submissions

Functionality is key to success in software development and computer science, so it is **extremely important** that the guidelines are followed. Failure to follow these instructions will result in penalties.

1. Your code should be maintained in GitHub.
2. Comment out if used outside sources.
3. Code must compile/run in debug and release mode. Debug information should never be released in the final version of a software project. **Projects that do not compile AND run will be graded accordingly**.
4. Include only those files specified by the documents in your archive. Projects should have no directory structure except as explicitly mentioned in the documentation (i.e., relevant files and folders should be submitted in the root of the zip file). It should be possible to open the archive, copy your files directly into the project, compile, and then run the project without further steps. **If the project has naming or organization error(s), its grade will be zero.**

Grade reviews must be requested by email within one week of a grade being posted. After one week, grades will not be revisited.

Peer Evaluations

Each team member will score their team members and themselves. They are to provide a rating and justification of the rating. A team member who has an average peer evaluation score of 70-79.9 will receive a 15% penalty for the associated assignments. A team member who has an average peer evaluation score of less than 70 will receive a penalty determined by the professor of the course, considering the evaluated contribution and justification provided by their team members. Peer evaluations must be completed to receive a peer evaluation score.

University Policies and Resources

Information about grading policies, support for students with disabilities, course evaluations, the Honor Code, and other course policies and campus resources can be found on the Syllabus Policies page.

Attendance Policy

Excused and Unexcused Absences

Students may only participate in classes if they are registered officially or approved to audit with evidence of having paid audit fees. The Office of the University Registrar provides official class rolls to instructors.

Students are responsible for satisfying all academic objectives as defined by the instructor. Absences count from the first-class meeting.

Acceptable reasons for absence from or failure to engage in class include illness; Title IX-related situations; serious accidents or emergencies affecting the student, their roommates, or their family; special curricular requirements (e.g., judging trips, field trips, professional conferences); military obligation; severe weather conditions that prevent class participation; religious holidays; participation in official university activities (e.g., music performances, athletic competition, debate); and court-imposed legal obligations (e.g., jury duty or subpoena). Other reasons (e.g., a job interview or club activity) may be deemed acceptable if approved by the instructor.

For all planned absences, a student in a situation that allows an excused absence from a class, or any required class activity must inform the instructor as early as possible prior to the class. For all unplanned absences because of accidents or emergency situations, students should contact their instructor as soon as conditions permit.

Students shall be permitted a reasonable amount of time to make up the material or activities covered during absence from class or inability to engage in class activities because of the reasons outlined above.

If a student does not participate in at least one of the first two class meetings of a course or laboratory in which they are registered, and they have not contacted the department to indicate their intent, the student can be dropped from the course. Students must not assume that they will be dropped, however. The department will notify students if they have been dropped from a course or laboratory.

The university recognizes the right of the instructor to make attendance mandatory and require documentation for absences (except for religious holidays), missed work, or inability to fully engage in class. After due warning, an instructor can prohibit further attendance and subsequently assign a failing grade for excessive absences.

Religious Holidays Guidelines

At the University of Florida, students and faculty work together to allow students the opportunity to observe the holy days of their faith. A student should inform the faculty member of the religious observances of their faith that will conflict with class attendance, with tests or examinations, or with other class activities prior to the class or occurrence of that test or activity. The faculty member is then obligated to accommodate that particular student's religious observances. Because students represent a myriad of cultures and many faiths, the University of Florida is not able to

assure that scheduled academic activities do not conflict with the holy days of all religious groups. Accordingly, individual students should make their need for an excused absence known in advance of the scheduled activities.

The Florida Board of Education and state law govern university policy regarding observance of religious holidays.

Guidelines

- Students, upon prior notification to their instructors, shall be excused from class or other scheduled academic activity to observe a religious holy day of their faith.
- Students shall be permitted a reasonable amount of time to make up the material or activities covered in their absence.
- Students shall not be penalized due to absence from class or other scheduled academic activity because of religious observances.

If a faculty member is informed of or is aware that a significant number of students are likely to be absent from class because of a religious observance, the faculty member should not schedule a major exam or other academic event at that time.

A student who is to be excused from class for a religious observance is not required to provide a second party certification of the reason for the absence. Furthermore, a student who believes that they have been unreasonably denied an education benefit due to religious beliefs or practices may seek redress through the student grievance procedure.

Absence due to Illness

A student who is absent from class or any required class-related activity because of illness should contact their instructor, if feasible, as early as possible prior to the missed class or activity.

Students shall be permitted a reasonable amount of time to make up the material or activities covered during an excused absence.

Students should contact their college by the deadline to drop a course for medical reasons. Students can petition the Dean of Students Office to drop a course for medical reasons. The university's policy regarding medical excuse from classes is maintained by the Student Health Care Center.

Twelve-Day Rule

Students who participate in university-sponsored athletic or scholarly activities are permitted to be absent 12 scholastic days per semester without penalty. A scholastic day is any day on which regular class work is scheduled as defined in the approved university calendar. More Info

The student or student's advisor must notify the instructor as early as possible prior to the anticipated absence to allow ample time for accommodations. Instructors must be flexible and not penalize students when re-scheduling during-term and final exams, class assignments, and other required activities and must follow the UF Attendance Policy herein and UF Examination Policies. As noted in the UF Examination Policies, during-term exams should be re-scheduled no later than before the end of the semester, while final exams no later than 90 days after the originally scheduled exam time. However, instructors are encouraged to re-schedule final and during-term exams, assignments, and other activities as soon as possible after the last day of the absence and must not penalize the student in any way. More Info

A group's schedule that requires absence of more than 12 scholastic days should be adjusted so that no student is absent from campus more than 12 scholastic days. Students who previously have been warned in writing by their instructor about the impact of absences on their individual class performance should not incur additional absences,

even if they have not been absent 12 scholastic days. The student is responsible to maintain satisfactory academic performance and attendance.

Course Policies and Resources

Students should arrange for project help and grade questions during office hours with the TA or professor.. **Do not send email to, send private messages to, or "@" instructors or TAs about grades.

For matters directed to the professor, email the professor directly.

Peer Evaluations. Each team member will score their team members and themselves. They are to provide a rating and justification of the rating. A team member who has an average peer evaluation score of 70-79.9 will receive a 15% penalty for the associated assignments within that sprint. A team member who has an average peer evaluation score of less than 70 will receive a penalty determined by the professor of the course, considering the evaluated contribution and justification provided by their team members. Peer evaluations must be completed to receive a peer evaluation score.

Late and Make Up Work Policy

Assignments are due by the time listed on Canvas. Assignments can be turned in late with a cascading deduction: one (1) business day from the Canvas date is a 10% penalty; two (2) business days from the Canvas date is a 30% penalty; or three (3) business days from the Canvas date is a 60% penalty. Assignments submitted after 11:59 pm on a due date of Friday are considered late if turned in at 12:00 am on Saturday and will be considered 1 day late until Monday 11:59 pm. Assignments will not be accepted after 3 business days. Weekly reports and Peer Evaluations are NOT ACCEPTED LATE. Weekly Reports and Peer Evaluations must be turned in by the due date to receive credit.

Requirements for make-up assignments and other work in this course are consistent with university policies that can be found at Attendance Policies.

As this is an online class, you are responsible for observing all posted due dates and are encouraged to be self-directed and take responsibility for your learning.

Assignments will be graded 3 weeks after they are submitted.

Classroom Behavior

UF students are bound by The Honor Pledge which states, "We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: "On my honor, I have neither given nor received unauthorized aid in doing this assignment." The Student Honor Code and Student Conduct Code specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the instructor or TAs in this class.

**Academic Dishonesty will be dealt with strictly. Sharing / copying, "borrowing" of work that is not your own original work is considered academic dishonesty. code structure, discussing code structure, looking at code from another student or providing such code, and plagiarism, in addition to other dishonest behaviors, are all considered academic dishonesty. Absolutely no information regarding assignment solutions may be shared by students except at a conceptual level. If students implement algorithms from other sources, they must cite those sources.

Technology in the Classroom

The University of Florida expects students entering an online program to acquire computer hardware and software appropriate to their degree program. Most computers are capable of meeting the following general requirements. A student's computer configuration should include:

- Webcam
- Microphone
- Broadband connection to the internet and related equipment (cable/DSL modem)
- Microsoft Office Suite installed (provided by the university)

Individual colleges may have additional requirements or recommendations that students should review before starting their program

Code Submissions

Functionality is key to success in software development and computer science, so it is extremely important that the guidelines are followed. Failure to follow these instructions will result in penalties.

- Your code should be maintained in GitHub.
- Comment out if used outside sources.
- Code must compile/run in debug and release mode. Debug information should never be released in the final version of a software project. Projects that do not compile AND run will be graded accordingly.
- Include only those files specified by the documents in your archive. Projects should have no directory structure except as explicitly mentioned in the documentation (i.e., relevant files and folders should be submitted in the root of the zip file). It should be possible to open the archive, copy your files directly into the project, compile, and then run the project without further steps. If the project has naming or organization errors, its grade will be zero.
